

ALLEGRI CESARE SPA

ALLEGRI CESARE, EVER SINCE PRODUCER OF ASSEMBLED PTFE FLEXIBLE HOSES

Our Company has been in the fluid transport business from over 50 years and from over 30 years we are leader in the PTFE flexible hoses market . Among the first Italian firms to propose PTFE hoses , over the years our experiences and technology make our Company the italian reference for this particular products. Currently our Company occupies a surface of around 3.000 mqs and our ultramodern machineries allow us to produce with a relationship quality-price extremely competitive. Our technology and our machineries are quickly evolved to offer new solutions to our Customers .We manufactured our fittings entirely in our ultramodern turning department in such of way all production steps are highly and constantly checked by our specialized staff. Our fittings have manufactured without welding and all the components are marked for the recognition of the producer .

Important results have been obtained also with flexible hoses; we have a large range : smooth bore PTFE hoses, convoluted PTFE hoses, hoses with low convolution or high convolution , anti-static PTFE inner core and a new solution that has been defined "The PTFE hose of the new millennium" our hose "W.FLEX" . W.FLEX is a smoothbore highly flexible, PTFE lined hose. Its design overcomes the disadvantages of conventional smoothbore and convoluted PTFE flexible hose designs : W.FLEX doesn't force the Customer anymore to have to choose among "smoothbore hoses, but rigid" or "flexible hoses, but convoluted"

Our PTFE hoses range is also integrated by our silicone hoses, available in various typologies
