

FPS FOOD AND PHARMA SYSTEMS SRL

NEW PILOTMILL-ZERO 0.01 GR

F.P.S. Food and Pharma Systems Srl combines more than 40 years of experience in the pharmaceutical, fine chemical, food and cosmetic industries, designing and manufacturing micronisation equipments and containment solutions.

We can offer a complete range of jetmills to reduce particle dimensions of any kind of material, from micronisation equipments R&D and for Laboratory needs up to production equipments.

New! PILOTMILL-ZERO – minimum batch 10mg!

PILOTMILL- ZERO is the world smallest fluid jet mill. Together with the established LABOMILL and PILOTMILL-1 it completes the FPS line of micronisation systems specifically designed for pharmaceutical R&D laboratory applications. It is based on the proven FPS Spiral Jet Mill technology, designed to effectively operate despite the miniaturized construction and maintaining a high performance level and reliability.

PILOTMILL-ZERO represents the perfect solution for preliminary feasibility micronisation trials with milligram size batches of New Chemical Entities, as well as of many other products.

10mg is minimum batch micronized

Recovered product: 190mg (95% of yield on 200mg batch)

At FPS R&D and Test Centre it is possible to perform technical trials with your products and PILOTMILL-ZERO.
