

GF Filling and Inspection machines

GF SPA is a dynamic Italian company, founded in 1979, which has a long experience in the design and production of hi-tech filling, capping and inspection machines for the pharmaceutical and food industries.

Among its numerous customers, GF is proud to have served some of the most important international brands such as Baxter, Bristol Myers Squibb, Fresenius Kabi, Gambro, Pharmacia & Upjohn, and others.

The main products of GF are:

- Inspection machines for various liquids and powders contained in ampoules, vials, syringes, glass or plastic bottles, and bags;
- Linear or rotary filling machines, which operate in a standard or modified atmosphere, for glass, soft or rigid plastic containers, bags, and bottles;
- Stoppering/capping machines for glass or plastic containers with optional multiple vacuum-nitrogen cycles;
- Complete lines for the production, filling and packaging of pharmaceutical products.

Since its birth, the primary strengths of GF have always been:

- Continuous research and innovation: GF has an advanced R&D department and is one of the few Italian companies officially recognized as "Laboratory for Industrial Research" by the Italian University and Research Ministry;
- Highly personalized products: all of our machines are designed and developed according to the specific needs of the Client;
- Quality assurance: GF processes and products are certified ISO 9001:2000;
- Flexibility and quick delivery time;
- Competitive prices and payment conditions.
