

NUOVA FARMACEUTICA SRL

COMPANY'S PRESENTATION

Nuova Farmaceutica S.r.l. is a new company producing food supplements, dietary and nutraceuticals. Nuova Farmaceutica has built near Catania a manufacturing plant of approximately 2200 square meters, that accommodates production packaging warehouse and services facilities. In a separated building there are offices and the testing laboratory for quality-control. The whole complex was built in compliance with all EU legislation on pharmaceutical plants and according to GMP. For the production and packaging of various pharmaceuticals forms, tablets, capsules, sachets and bottles, were bought the best machines that exist today for the pharmaceutical market. Of these machines are equipped with many major pharmaceutical companies, Italian and worldwide. Even the testing laboratory is equipped with the best equipment in the field, with which they carry out the analysis of product during the various stages of processing, starting from raw materials to the finished and packaged product.
