

## **OTTENSCHLÄGER GMBH**

### **SPECIAL MACHINERY FOR THE PHARMACEUTICAL AND CONFECTIONARY INDUSTRY**

We are manufacturer of sorting machines, visual inspection machines and feeding systems for all solid dose forms for the pharmaceutical and confectionary industry. We have over 20 years of experience. Our team is competent and flexible in order to fulfil the individual requirements of our customers worldwide.

On the Pharmintech 2010 we show our automatic tablet sorting machine DUDIKO which is used for the precise sorting of tablets, dragees, candies, chewing gums, soft and hard gelatine capsules according to the diameter or length of oblong shaped products, twins, broken pieces and thickness.

Furthermore we show our cleaning trolley for this sorting machine. The cleaning trolley means ease of cleaning of the sorting machine. The advantages are the fast cleaning procedure and the safe handling of the removable parts. The risk of damages is extremely reduced and therefore the costs for replacement or repair are decreased to a minimum.
