

Pharmacontrol Electronic GmbH presents this year's Pharmintech innovative, high performance and safe products for Pharma Track & Trace

Pharmacontrol Electronic GmbH is independent market leader for electronic control systems with considerable technological innovations for Track & Trace. With more than 20 years of experience with a clear focus on pharmaceutical industry today the top 20 of worldwide most important pharmaceutical enterprises are among their customers. Their target is securing transparency in pharmaceutical logistics for the protection of patients' safety. Their business activities are, besides code reading technology, camera controls, administration software and service. Pharmacontrol Electronic GmbH presents this year's Pharmintech innovative, high performance and safe products for Pharma Track & Trace thereunder Shipping Case Station. A fixed mounted Megapixel Camera will identify the whole case and will append those unit-ID's to the newly generated case-ID in the database. Faulty cases (code not readable or wrong information) will be signalised with alarm light. Fixed data fields loaded at production start, variable data fields (serialisation string) will be submitted on demand. With this camera we are able to check the completeness and orientation of units in a shipping case.ezza e il corretto orientamento della singola unita all'interno del cartone prima della spedizione.
