

TRADEX SRL

TRADEX NEWS AT PHARMINTECH

TRADEX S.r.l. is a protagonist in labelling, coding and automatic identification market from over 35 years. The continuous world-wide research of new products and brands to represent in Italian market, consent TRADEX to offer a valid and future proof solutions. At Pharmintech, a besides famous IJ350, TRADEX will be introduce the newest high definition ink-jet coder Linx IJ200. It's innovative technologic features introduce new quality standard in terms of versatility, print speed and lowest running costs. Texts, logos, imagines, barcode, datamatrix, remote fields and prompted data field for operator input are only an examples of innovative features available. Linx continuous ink-jet solution names 7300 class. 3 news patented features eliminates any problems about message security management - QUICKSWITCH™-, ink and solvent filling procedure and printhead washing operations. MACSA proposal – it's a TRADEX exclusive sales for Italian market – is a complete technology laser range like CO₂, YAG e fiber used in most advanced production lines. Fast products traceability coding system in the world is now available also on the iCON laser. It's quality is not comparable with it's price. All company can today change print equipments from oldest ink-jet to green quality laser technology without any big investment of money. TRADEXIMPIANTI will show many personalized solution in secondary packaging marking and coding equipments. TECNOFLUSS will be presents with it's completely automatic and already patented at international level Rotating Monoblocco Multiformat MRM 900. This totally automatic equipment allows automatic filling and capping operations of any type of containers, with a single rotating star of 900 mm which adapts to the product characteristics and with a control unit able to memorize and organize all the operations automatically. The format change is made in real time through remote control via modem setting all data to the new prescription. All easily managed from a single operator, with the MRM monobloc time costs are deeply reduced.
