MAY 12-14 2010: A NEW, MORE INTERNATIONAL PHARMINTECH

[View the complete list of exhibitors](#)

The official opening of Pharmintech, the reference exhibition for the pharmaceutical, personal care and nutraceutical industry is just a little more than two months away. All figures indicate that the exhibition is expected to be once again a success: there are approximately 300 exhibitors, 10% more than the previous edition, including 41% of new entries and 35% of international exhibitors. It is bound to be an all-comprehensive, influential event not only for the number of exhibiting companies: the exhibiting surface is just short of 6,100 m², occupying pavilions 19 and 22 of the Bolognafiore exhibition center with a single-storey layout.

Pharmintech is also becoming increasingly international: it draws strong interest from foreign countries also in terms of visitors, with 70 delegations coming from 23 countries in addition to a considerable presence of international press.

The product display at Pharmintech becomes wider, richer, more all-comprehensive with each edition. In particular, for the first time pavilion 22 will host companies offering contract services for the pharmaceutical industry such as manufacturing and packaging. Watch out for more news about interesting additions to the product display...

MEET THE FUTURE AREA: UNIVERSITY AND RESEARCH AT PHARMINTECH

In addition, the event will feature a new area dedicated to research and development projects for cut-edge pharmaceutical technology presented by ten preeminent Italian universities. This initiative was made possible through the support of Farindustria.

It is the first time that academic research is given so much space and relevance within an exhibition, sharing the spotlight with the most influential companies of the pharmaceutical industry. Over the three exhibition days each university will present projects and researches dedicated to potential developments in drug manufacturing and management technology. The faculties of Pharmacy, Engineering and Science through their pharmaceutical application departments will have the chance to show their contribution to the industry within an exhibition unequalled in Europe, and at the same time students will learn about the job opportunities offered by the represented industries. This is a valuable opportunity for both universities and manufacturing companies to exchange opinions, projects and knowledge. Universities will be located in the dedicated area of pavilion 22, including the universities of Bologna, Milan, Parma, Pavia, Pisa, Rome, Salento, Turin and Urbino.

THE INNOVATION CORNER: SOME SUCCESSFUL CASE HISTORIES

Pharmintech will also present yet another new project: pavilion 22 will host a "piazza" where visitors will have the chance to hear some successful case histories presented by exhibitors. It will be an extraordinary showcase giving visitors the opportunity to choose the most interesting topics from 6 daily presentations of 1 hour each. In particular, on May 13th the presentations will focus on drug traceability.

CONVENTIONS AND MEETINGS: A PREVIEW

[View the updated list of all meetings](#)

Pharmintech is backed by a rich agenda of prestigious meetings, including the

event staged on the eve of the exhibition's official opening organized by Ipack-Ima Spa in cooperation with associations ISPE and PDA. The international convention "Designing Quality, Efficiency and Sustainability into Pharmaceutical Processes" will be held on May 11th 2010 at the Royal Hotel Carlton, Bologna.

On May 12th, the role and status of the industries supplying the pharmaceutical, personal care and nutraceutical production will be the central topic of the Third Report by the Pharmintech Observatory, a research project promoted by Ipack-Ima spa and managed by CNR researcher and Industrial Economists' Association secretary Giampaolo Vitali. On May 13th the Contract Manufacturers Association, established last year as part of Farindustria, will relate on the current outsourcing trend with special reference to highly specialized processes during the workshop "The current status of Contract Manufacturing in Italy" On May 14th the Italian Packaging Institute will stage a round-table discussion called "Drugs and medical devices: the new packaging frontiers". The discussion will feature a debate between experts in drug and medical device manufacturing processes and representatives of the National Health Institute.

See you soon at PHARMINTECH!
